

iStreet Network Limited

Chairman Speech for 38th AGM of iStreet Network Limited – September 26, 2025

Dear Shareholders,

Over two thousand years ago, Chanakya said it best:

‘विद्या धनं सवधनप्रधानम्’ – Knowledge is the supreme wealth, greater than all riches.

Some advance to greatness. Some return to it. Rarely do they do both. Bharat has the potential to do both.

From Nalanda and Takshashila to our scientific and spiritual traditions, this land has always thrived on discovery and most importantly on knowledge transfer across generations.

And yet, in the modern era, when the industrial, nuclear, space, and IT revolutions arrived, Bharat powered these waves.

The AI age changes this equation.

Because AI is not built on oil or machines – it is built on data, scale, and intelligence.

And here, Bharat holds the edge.

We are the world's largest population, the biggest generator of data, the richest talent pool, and the very epicenter of scale.

This is why we created iStreet's AI Centre of Excellence; not an idea, not a concept, but an execution engine that converts Bharat's raw potential into leadership.

- It means building predictable financial models using GenAI so governments and enterprises can plan with confidence.
- It means securing national sovereignty by keeping our data where it belongs, and ensuring we stay ahead of the world's greatest threat right now – cyber warfare.
- It means embedding compliance into the DNA of solutions, so trust is not a hurdle but the foundation of adoption.
- It means reviving our tradition of mentorship, where industry veterans in business, technology, finance, and regulation guide founders from pilots to production.
- And it means creating an employment ecosystem where Bharat's brightest minds no longer need to leave to succeed.

The current global shifts are a blessing for Bharat, they ensure our talent stays home, multiplying our already abundant human capital. At iStreet, we are channeling this strength into augmented intelligence- AI that enhances human capability rather than replaces it, so that we can truly honor and empower those who build the nation.

These forces together- Bharat's data advantage, our India-first Global-ready approach, our mentor-driven ecosystem, and focus on augmented intelligence, will make iStreet the Sanjeevani of the AI wave.

The world will come looking for our solutions, because only Bharat can offer intelligence that is resilient, compliant, human-centered, and globally scalable.

From Sanskriti to Singularity, this is Bharat's moment to lead.

Rooted in India. Engineered for the world.

Thank You for your kind attention.

Uttam Ishwarlal Dave
Chairman of the meeting
